3 in 1 Camera Lens Set

CAM001

Wide-angle, fish-eye, and macro, this lens set has it all. It's the perfect accessory for your Raspberry Pi camera module (or phone!).

This lens kit means that you can use your camera module in many exciting ways:

- **Wide-angle lens:** Ideal for capturing those landscape shots/night sky time-lapses
- **Macro:** Beautiful close-up images of anything from insects to circuit boards
- **Fish-eye:** Security systems and crazy 180° FOV shots

Each lens screws into the clip which fits perfectly onto your camera module.

Please note: when you receive the kit the fish-eye lens is already screwed onto the macro lens!
